JOURNAL

AUTHORS

\* NOTE: Estimated insert size may differ from sequence length

(see http://www.hgsc.bcm.tmc.edu/docs/Genbank\_draft\_data.html).

\* NOTE: This is a 'working draft' sequence. It currently

\* Consists of 51 contigs. The true order of the pieces

\* is not known and their order in this sequence record is

\* arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence soon as it is available and preserved. 1052 1152 2287 2387 2387 3434 3534 4615 4715 1051: contig of 1051 b 1151: gap of unknown 1 2286: contig of 1105 b 2386: gap of unknown 1 3433: contig of 1047 b 3533: gap of unknown 1 4614: contig of 1081 b 4714: gap of unknown 1 6581: contig of 1867 b 6681: gap of unknown 1 of 1051 bp in unknown length the accession number will bp in length bp in ģ length bp in length length in length length length length length

               Submitted (24-MAY-2002) Wellcome Trust Sanger Institute, Hinxton, Cambridgeshire, CB10 ISA, UK. E-mail enquiries: humquery@sanger.ac.uk Clone requests: Clongerequest@sanger.ac.uk On May 25, 2002 this sequence version replaced gi:21213601. During sequence assembly data is compared from overlapping clones. Where differences are found these are annotated as variations together with a note of the overlapping clone name. Note that the variation annotation may not be found in the sequence submission corresponding to the overlapping clone, as we submit sequences with a small overlap as described above.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Submitted (23-OCT-1998) Molecular Oncològy, Genentech, Inc., 1 DNA
